AluGrid – Checklist GB

Different designs and their clamping positions

AluGrid

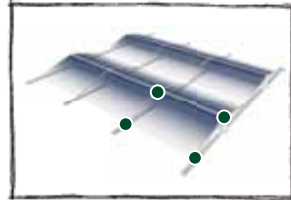

top: long side
bottom: at the corners

AluGrid+

top: long side
bottom: long side

Please consider the additional charge for AluGrid100+ of about 10% - 14% compared to AluGrid

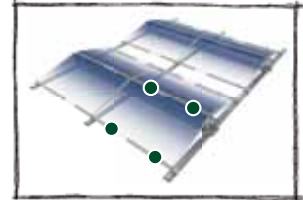

AluGrid100

top: at the corners
bottom: at the corners

With AluGrid100, generally a row distance of 50 mm is assumed. If you want bigger row distances (for example for maintenance catwalks), please specify your desired row distance here:

Row distance (50-500 mm)

AluGrid100+

top: long side
bottom: long side

Please consider that there is an extra charge of 20 - 25% compared to AluGrid100

With AluGrid100+, generally a row of 50 mm is assumed. If you want bigger row distances (for example for maintenance catwalks), please specify your desired row distance here:

Row distance (50-500 mm)

Surface protection components

EPDM support rubber

The check of compatibility with the roof covering has to be carried out by the customer!

Surface protection mat

1 m x 10 m, 6 mm (with aluminium lamination)

Special fasteners

AluGridT

Please read all the information in the AluGridT product sheet!

Sheet metal thickness

Distance between the crowns

Particularities:

Thank you for taking the time to provide the required information.

Please fill in the check list completely and send it back to us so that we can create your calculation as quick as possible.

Please send the check list by fax to +49 8072 9191-9200 or by e-mail to anfrage@schletter.eu!
